WORK EXPERIENCE

Synthesis Systems

Aug 2022 - Jan 2024

Experienced software developer with expertise in front-end development using React and back-end development using Node. Possessing a strong background in web application development and Zuora implementation.

Zuora Payment Method capture

Hosted an end user Integrated website using Node.js, React, and SQL with features including user authentication, payment capture, and payment posting functionality for Zuora using the Zuora API's and postman for testing the API's .

E-sign Integration Tool with Salesforce for Zuora quotes

Developed and implemented an E-Sign integration tool within Salesforce to streamline and automate the document signing process for sales and customer success teams. The Apps used to integrate were Adobe e-Sign and HelloSign.

Zuora Data Migration Tool

Worked on the Frontend development of the data migration tool using React.js , which had various data migration functionalities .

SyBoss Project

It was a order fulfillment Process project which started from the Salesforce side where customers selected the products and went through adapter side which sent it further to the BRM and the OSM side from the confirmation is done and i worked on the adapter side of the project .

Dietary Business Intelligence (DBI 360)

Jan 2024 - Present

Experienced software developer with expertise in front-end development using React, Next.js and other related technologies.

Buyers Flow

- Developed and maintained Buyer's Flow which was a automated email sending (with AI features) website with multiple other modules and it has a sequence module which is like a workflow where you can control the email flow.
- Collaborating with cross-functional teams including designers, product managers, and other developers to create high-quality products.
- Participating in code reviews and providing constructive feedback to other developers.

Suppliers Discovery

- Developed and maintaining Supplier's Discovery where we can Buy and sell products based on the preference we give and has permissions for different modules in buyer and supplier accounts and it maintains the whole process from quote creation, purchase Order to Invoice and shipping with an Admin panel who has access to all the feature.
- Collaborating with cross-functional teams including designers, product managers, and other developers to create high-quality products.
- Implementing responsive design and ensuring cross-browser compatibility.

Personal Projects

MOODIFY

[Show Project](#)

A React-based Ambient Sound Player with Audio Web API for Insomnia Relief (HTML, CSS, JavaScript, ReactJS, Material UI)

"Moodify" is a React-based web application that helps users alleviate insomnia by playing soothing ambient sounds using Audio Web API. I designed and developed the UI, integrated the audio playback, and added save and shuffle play functionalities.

MOVIEFLEX

[Show Project](#)

Built a Responsive Movie App with React and MovieDB API, featuring Trending Movies, Trailers, and Search Functionality. (HTML, CSS, JavaScript, React, Material UI)

Developed a responsive movie application using React and MovieDB API. Features include trending movies and series, detailed descriptions, YouTube trailers, and search functionality. Enhanced the movie experience for users with a user-friendly and seamless application.

PORTFOLIO

[Show Project](#)

Built a Responsive Portfolio App with React . (HTML, CSS, JavaScript, React)

Developed a responsive portfolio application using React and that shows the skills i have and the past work experiences.

Education

KNS Institute Of Technology
